

## Protein Production Manager

HumanZyme, Inc. is a rapidly growing Chicago-based company providing authentic recombinant human proteins from human cells as superior reagents for the research and drug discovery markets. The company has successfully developed a significant number of catalog products and established strategic alliance with biotech and pharmaceutical companies. The position will lead the production effort and work together with the R & D and marketing team to ensure timely production of recombinant proteins and immunoassay kits with ensured quality.

### Requirements

- Ph.D/Ms. in Biochemistry, or related discipline
- Experience with managing purification and preparation process of protein materials in a manufacturing environment
- Must have experience in protein expression and purification
- Must have strong technical proficiency in protein chromatography (e.g. AKTA) and protein analysis techniques
- Must have proven leadership skills and the ability to work effectively in a multi-project environment.
- Must possess strong interpersonal and verbal/written communication skills
- GMP experience is preferred
