

Protein QC Analyst

HumanZyme, Inc. is a rapidly growing Chicago-based company providing authentic recombinant human proteins from human cells as superior reagents for the research and drug discovery markets. The company has successfully developed a large number of catalog products and established strategic alliance with leading biotech and pharmaceutical companies. We are seeking a highly motivated Scientist to perform assays and other critical quality procedures. The position will be reporting to the production manager and interfacing with production scientists, with a role focused on ensuring high and consistent quality of our expanding recombinant proteins and antibody products.

Requirements

- MS/B Sc. in Biochemistry, chemistry, or related discipline with emphasis in analytical chemistry
- Must have strong technical proficiency with a variety of protein chromatography and analysis techniques
- Experience with gel electrophoresis, FPLC, HPLC, endotoxin quantification, cell-based and ELISA assay
- One year in an industrial quality control capacity is required

Forward your resume including three references by mail to the address below, or electronically to info@humanzyme.com. Please: no calls or agencies. HumanZyme Inc. is an Equal Opportunity Employer.
